SUMMARY

Senior Software engineer - TypeScript, React, Next.js, NodeJS, Python. I spent seven years at Bluecore working across one product: the JavaScript runtime that runs on retailer sites, the React app that manages it, and the AI agent that automates it. I'm now engineering Biker Bazaar solo — a live fullstack marketplace (Next.js, TypeScript, Supabase, Razorpay).

PROFESSIONAL EXPERIENCE

Biker Bazaar, *Founding Engineer*

Present | Noida, UP

- Founded Biker Bazaar (bikerbazaar.in ) and built the entire product solo. It's live, actively maintained, with new features shipping regularly.

Bluecore Software Pvt. Ltd.

Senior Software Engineer 2

02/2026 | Remote

- Automated data extraction and Python 2 to 3 migration for **450+** repositories using Claude Code, mentoring 2 engineers with 100% success rate.
- Developed end-to-end **data imports UI** module using Next.js, reducing job time from hours to minutes for 200+ client employees.

Senior Software Engineer 1

02/2023 – 01/2026 | Remote

- Built Audience Builder **AI Agent** using GCP, Python, and FastAPI, reducing manual configuration time by **99%** by converting natural language to UI audiences.
- Architected **self-improving RAG** database with user feedback integration, increasing AI agent accuracy by **over 50%** for enhanced audience targeting.
- Championed knowledge sharing through organizing and leading tech talks focused on agentic AI.
- Streamlined audience creation process from **hours to 6-7 seconds** through the implementation of the audience AI agent.
- Launched **6+ new components** for seamless website campaign creation, integrating advanced audience segmentation features and adding SMS contact card capabilities.

Software Engineer 2

02/2021 – 01/2023 | Remote

- Collaborated with **10+ members** from Backend, Product, and Campaign Developers to create full experience journeys, covering lead capture, recommendation systems and many more types.
- Decreased campaign loading times by **1000-1500ms** through custom library implementation, enhancing user experience.
- Replaced jQuery with custom lightweight library, **reducing bundle size by 5x** (30KB to 6KB) while maintaining full functionality.

Software Engineer 1

12/2018 – 01/2021 | Noida, Remote

- Engineered and launched a high-performance JS library, serving personalized campaigns to **30+ million users** daily.
- Collaborated with 10+ HTML developers to gather performance insights, enabling the continuous launch of improved JS library versions.
- Implemented **A/B testing**, user session management, and user targeting rules, increasing retailer product adoption by 50%.
- Initiated IndexedDB integration for client-side data storage, improving personalization performance by over 50%.

JMoon Technologies Pvt. Ltd., *Robotics and AI Research Intern*

08/2018 – 11/2018 | Delhi

- Designed CNN-based facial recognition pipeline achieving **97% accuracy**, optimized for real-time inference on on **Odroid XU4** micro-controller running on **2GB RAM**.

SKILLS

JavaScript, React, Node.js, NextJS, Express.js, Python, FastAPI, TypeScript, System Design, SQL, Google Cloud Platform, Cursor, ClaudeCode, OpenCode, CI/CD, REST APIs, GraphQL, RAG Systems, LLM Integration, Docker

EDUCATION

B.Tech in Computer Science, *Hindustan College of Science & Technology*

08/2014 – 05/2018 | Mathura

78.78%

ACHIEVEMENTS

Peer-nominated VIC Award, *Bluecore*

2020

Received VIC Award for scaling campaign architecture in a short time period, supporting peak sales events for major US E-com retailers.

2nd Runner Up @ E-Yantra Robotics Competition 2016, *IIT Bombay*

2016

Built autonomous robot from scratch, demonstrated at IIT Bombay finale.
